Some of the UK’s most successful YouTube stars have a connection to UK universities. Vloggers Jack Howard and Thomas Ridgewell are graduates of the University of Exeter and Leeds Beckett University respectively. Their talents in the university’s music department have paved the way for their successful YouTube careers.

Musicians are not the only ones benefiting from higher education. The creators of the award-winning digital agency Elixel, formed by four graduates, have won several prestigious awards. Their postgraduate education at universities such as the University of Plymouth has equipped them with the skills needed to succeed in their industry.

Not all graduates find success in the music or digital spheres. Some, like Krysty Wilson-Cairns, the co-writer of the Oscar-winning film 1917, find success in the film industry. She studied radio, film and television at the University of Manchester, which has a strong reputation for its contributions to the film industry.

The University of Exeter is also home to one of the UK’s most successful YouTube stars. The comedy duo of Nish Kumar and Bob the Builder have collaborated on several projects, including the production of the animated series PAW Patrol.

The University of Plymouth is also home to several successful graduates. The university is home to the team that is bringing the world’s first digital twin of a city to life. This project is expected to have a significant impact on the city’s economy.

The University of Bedfordshire is also home to several successful graduates. The university is home to the team that is bringing the world’s first digital twin of a city to life. This project is expected to have a significant impact on the city’s economy.
